

Communication when time is critical

ZipBridge is the new way to get a team on the phone in seconds.

Here's How ZipBridge Works in 3 Easy Steps

INCIDENT OCCURS

STEP 1

An authorized person LAUNCHES the call for the Team by dialing a Contact setup on his or her smartphone.*

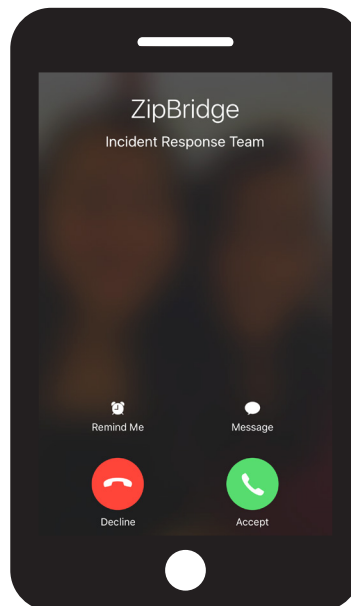

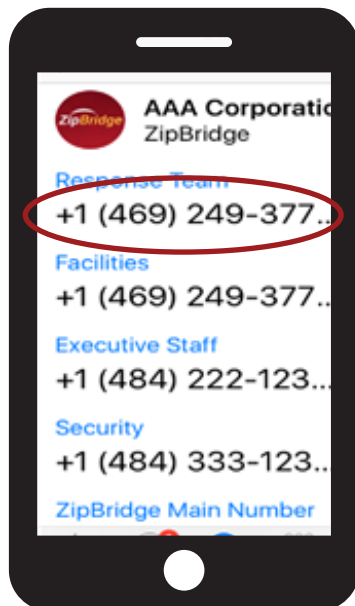

STEP 2

Members of the Team RECEIVE a phone call from a recognized number and ring tone.

STEP 3

Members are bridged on the call as they answer and begin communicating in seconds.

Plans start at \$249 annually

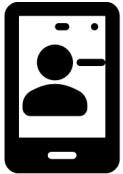

*See reverse side for call launch options.

FEATURE AND OPERATIONS SUMMARY

The ZipBridge platform **calls out** to pre-defined Members of different Groups and bridges them on a conference call as they answer.

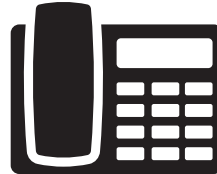

Calls can be launched through:

Smartphone
Contacts

ZipBridge
Mobile App

Pre-programmed
Speed Dial

www.zipbridge.net
on Desktop

Members are all called simultaneously on their mobile phone and if that is not answered:

- A text message is sent with a link to press to join the call – no PIN needed,
- An email is sent with dial in instructions – no PIN needed if calling from a phone number in the Group,
- A second call is placed to another number – work, home or auto-attendant.

All outbound calls to Members reflect the same CallerID so it can be added as a Contact with a custom ringtone for easy identification by sight and sound that this is an important call to answer.

Bulk one-way SMS messages can be sent to Groups when accessing ZipBridge from the mobile app or computer.

Calls can be launched to new Groups and they will be added to the existing call. For example Security determines Executive Staff is needed, just launch that Group and they are added to the existing call as they answer.

Ad hoc participants can join by calling the ZipBridge access number and entering a PIN

Calls can be recorded and downloaded as needed. Plans accommodate up to 15 Groups and 20 Members. Calls to international numbers are supported.
