

NEW PRODUCT ANNOUNCEMENT!

AC Charging Cart with Zone Charging

Charge, Secure and Organize up to 36 Devices in a Convenient Cart

Tripp Lite's newest charging cart alternates AC charging between zones to support higher wattages without overloads. It accommodates more Chromebooks and laptops than previous models and has new features for enhanced workstation functionality. The CSC36AC is a purpose-built solution for mobile devices in education, healthcare, retail, warehouse and office environments.

Model: CSC36AC

High-Speed Zone Charging

- Each device's power adapter has a dedicated AC outlet.
- Outlets are evenly divided into two 18-outlet charging zones, each supporting up to 1,440 watts.
- A built-in timer alternates charging between zones hourly to help prevent overloads.

Comprehensive Protection

- Key-locking front and back compartments deter theft of devices and power adapters.
- Flow-through ventilation helps prevent overheating.
- Corner safety bumpers protect walls and doorways from damage.
- Protective shelf finish helps prevent device scratches.

Clutter-Reducing Organization

- Designed for laptops up to 15 inches, the device slots are numbered and have removable dividers.
- Shelves, power strips and cable slots are color-coded by zone.
- Cables and power adapters stay neat with an overhead cable manager and removable storage baskets.

Convenient Mobility

- Swivel casters have large, non-marking wheels for smoother handling over uneven surfaces.
- Wide-grip handle assists cart control.
- Input cord wrap keeps the power cord out of the way.

Enhanced Workstation Features

- Solid laminate wood-grain worktop acts as a writing surface and protects devices from spills.
- Cat6 RJ45 pass-through port allows connection to an external Ethernet network to set up a user-supplied wireless access point inside the cart.
- An internal auxiliary outlet provides power to a peripheral, like a wireless router.
- Two external outlets power monitors, projectors or other equipment. An on/off switch inside the cart controls the outlets.

Feature Focus

SPECIFICATIONS

MODEL: CSC36AC

Form Factor	AC Cart
Compatible Devices	Chromebooks, Laptops and Tablets
Charging Method	36 AC Outlets with Dual-Zone Charging ⁽¹⁾
Charging Capacity	1,440W per Zone
Maximum Screen Size	≤15 in. Laptop (Depends on device dimensions)
