Innovative
Comprehensive
Secure

The REDTAIL Secure Visitor Screening module allows facilities, large or small, to easily check in/out, monitor, and log visitors, vendors, and contractors. The system uses patented GREENLIGHT® integration technology and can be configured to run instant checks against FBI criminal data sources as well as custom watch lists.

WHY REDTAIL?

Comprehensive

The REDTAIL Secure Visitor Screening module provides all the necessary components for a comprehensive system, including ID scanning, customizable badges, visitor screening and tracking, reporting, and visit requests.

Additional Layer of Security

The REDTAIL program uses the patented GREENLIGHT® technology for instant checks, which provides access to real-time FBI NCIC and State/Local criminal data – not just public databases that may be out of date – to screen for potential threats.

Person of Interest/Watch Lists

Custom Person of Interest or "Watch Lists" can be created and maintained in REDTAIL and searched when visitors check-in. Security officers can receive alerts if a person on the watch list enters the facility.

Visit Requests

Users of REDTAIL can schedule meetings and invite visitors. The system can be configured to pre-screen visitors based on security requirements.

REDTAIL MODULES

REDTAIL Secure Visitor Screening is one of several modules of the REDTAIL program. Other modules include:

Vendor/Contractor Credentialing
Tailored for individual industries; licensing

Watch Lists
Customized lists, alerts

Identity Verification
Know who is entering your facility

Risk Mitigation & Compliance
100% compliant with FCRA and EEOC

Background Screening
Criminal History, FBI Fingerprint & Identity, DMV Records, Sex Offender, and more

Patented Instant Visitor Screening
Instant access to FBI and State criminal data sources with patented GREENLIGHT® technology; maintains a DHS SAFETY ACT Designation & Certification.

Enterprise Mobility
Mobile check in/check out and personnel tracking

Analytics
Management, reports, alerts, and customizable dashboard

REDTAIL ™

REDTAIL INDUSTRIES

Retail	Healthcare/Pharmaceutical	Transportation
Financial	Education	Gaming/Arenas/Hotels
Energy/Nuclear/Chemical	Government	Aviation

Custom Alerts and Analytics

REDTAIL includes powerful reporting and analytical tools. Security, operations, and HR managers can receive custom alerts and management reports such as number of people who enter/exit facilities and snapshots of who is in their facilities and for how long.

Affordable & Scalable

Because the REDTAIL program can be customized and tailored, you will not pay for services you don't need. Additionally, REDTAIL is web-based, eliminating the need for software installation or major hardware purchases. The REDTAIL solution can be implemented with little to no up-front costs. The Secure Visitor Screening module is highly scalable and can be deployed at one site or thousands of sites.

DHS SAFETY Act Designation & Certification

» REDTAIL SVS utilizes the patented GREENLIGHT technology to allow access to NCIC data for REDTAIL Instant Checks.

» GREENLIGHT is a Certified Anti-Terrorism Technology under the 2002 SAFETY Act.
