

Omnigo Community

MOBILE PERSONAL SAFETY APP

Connect your employees, patrons, or students to your security or safety personnel with the Omnigo Community mobile app.

ENABLE ANONYMOUS REPORTING

Provide users with the means to anonymously report incidents or suspicious behavior to security via a simple, two-way chat interface that supports photo and video file attachments.

PROVIDE MASS NOTIFICATIONS

Notify users quickly with mass notifications. Omnigo Community's GPS capabilities enable messages to be sent to all users or those located in a specific area.

STORE CRUCIAL SAFETY INFORMATION

Upload and store safety procedures and policies for easy, mobile access by members of your community.

Enable quick, easy two-way communication between users and your security or safety personnel

FEATURES:

- » Provide location-based or organization-wide mass/push notifications
- » Generate case reports from submissions
- » Customize with your organization's branding
- » Allows users to submit anonymous reports, if desired
- » Accessible via secure, online dashboard or Omnigo Dispatch
- » Integrates with Omnigo Incident Reporting

TRACK INCIDENTS IN REAL-TIME

Provide your community with an extra level of protection. GPS capabilities enable you to pinpoint exactly where reports are generated, so you can quickly dispatch officers to a user's location.

GAIN VALUABLE INSIGHT

Optional integration with **Omnigo Incident Reporting** enables you to examine and analyze incident data from a bird's-eye view—and in real time—to gain deeper insight into what, when, and where incidents are occurring.
